2nd International Conference on Obesity & Diabetes
May 14-16, 2018
Melbourne, Australia
ABOUT OBESITY & DIABETES 2018

The Obesity & Diabetes 2018 aims to focus on the clinical aspects of diabetes and to update the attendees with the current knowledge and understanding of the treatment of diabetes and its complications. We have come forward with this “Obesity & Diabetes Congress” is going to be held on May 14-16, 2018 at Melbourne, Australia by Cenetri Publishing Group and this will encompass a variety of up-to-date knowledge on diabetes and metabolism.

SCOPE AND IMPORTANCE

Diabetes is increasing in epidemic proportions worldwide. In India alone, more than 68 million people have Diabetes. The need of the hour is to empower Health Care providers with Basic and Advanced Diabetes Care expertise for better management of Diabetes and its associated complications. Diabetes prevalence has been rising more rapidly in middle- and low-income countries and is a major cause of blindness, kidney failure, heart attacks, stroke and lower limb amputation. Number of people with diabetes has risen from 108 million in 1980 to 422 million in 2014. Among adults, prevalence of diabetes, over 18 years of age has risen from 4.7% in 1980 to 8.5% in 2014Almost half of all deaths attributable to high blood glucose occur before the age of 70 years. WHO projects that diabetes will be the seventh leading cause of death in 2030.
GLOBAL OBESITY AND DIABETES REPORT:

Today, more than one in two adults and nearly one in six children are overweight or obese in the OECD area. The share of children who are overweight or obese at age 15 ranges from 10% in Denmark to 31% in the United States. Across the OECD, 19.5% of the adult population was obese (Figure 1). This rate ranges from less than 6% in Korea and Japan to more than 30% in Hungary, New Zealand, Mexico and the United States. More than one in four adults is obese in Australia, Canada, Chile, South Africa and the United Kingdom.

Diabetes is on the rise. No longer a disease of predominantly rich nations, the prevalence of diabetes is steadily increasing everywhere, most markedly in the world’s middle-income countries. According to the Lancet study, China, India and USA are among the top three countries with a high number of diabetic population. While the numbers climbed from 20.4 million in China in 1980 to 102.9 million in 2014, the rise has been equally dramatic in India from 11.9 million in 1980 to 64.5 million in India. Prevalence of diabetes has more than doubled for men in India and China (3.7 per cent to 9.1 per cent in India and 3.5 per cent to 9.9 per cent in China). It has also increased by 50 per cent among women in China (5.0 per cent to 7.6 per cent) and 80 per cent among women in India (4.6 per cent to 8.3 per cent).
PROMINENT SCIENTIFIC SESSIONS

- Obesity and Metabolism
- Obesity and Cardiac issues
- Consequences of Obesity on Cancer
- Ties between Obesity and Diabetes
- New Directions in Obesity Treatment
- Preface to Obesity and Overweight
- Clinical Research and Interventions in Obesity
- Genetic Obesity
- Obesity-Health risks
- Endocrinal and Hormonal Obesity
- Weight Management
- Paediatric Obesity
- Eating and Obesity- Cultural Perspectives
- Progressing policies for Obesity
- Surgical and Non-surgical Treatments
- Childhood Diabetes & Obesity
- Endocrinopathy in Cancer
- Diabetes in Pregnancy, Reproduction and Infertility
- Alternative Therapies and Complications for Diabetes
- Insights on Nutritional Findings and Eating Disorders
- Diabetes Market and Business Analysis
- Diabetic Neuro &Nephropathy

- Endocrinology
- Clinical Management
- Genomic Endocrinology
- Neuroendocrinology
- Hormonal Disorders
- Diabetic Retinopathy
- Diabetes and its Treatment
- Diseases and Disorders
- Research and Advancements
- Cardiovascular Complications
- Cadio-Diabetes
TARGET AUDIENCE:

- Diabetologists
- Endocrinologists
- Doctors
- Dieticians
- Obesity Specialists
- Health Professionals
- Academic Professionals
- Business Entrepreneurs
- Medical colleges and Hospitals
- Medical and Pharma Companies
- Diabetes and Endocrinology Societies and Associations
- Obesity Societies and Associations
- Students
- Researchers

REASONS TO ATTEND

The scientific sessions offer researchers and health-care professionals a unique opportunity to share ideas and learn about significant advances in diabetes research, treatment and care. Over the course of three days, participants will receive exclusive access to more than 30 dynamic and innovative sessions, take part in engaging exchanges with industry-leading experts and expand professional networks. With the best-in-class Speakers from the leading global Diabetes Institutions - this conference would help bring the latest and the best practices in Diabetes care to Clinicians treating people with Diabetes and Obesity.

TOURIST ATTRACTIONS IN MELBOURNE, AUSTRALIA

Australia - the diverse land down under, home to so many fascinating natural landmarks and a country that is thought of in so many different ways. Australia boasts some of the world’s most beautiful natural wonders such as the Great Barrier Reef - the world’s largest coral reef system, the Heritage Listed Ayers Rock (Uluru), the Bungle Bungles in Western Australia, the Twelve Apostles along the Great Ocean Road. Man-made icons include the Sydney Harbour Bridge and the Sydney Opera House. The geography of Australia ranges from deserts, mountainous, tropical islands, rain forests, lakes and rivers.

Australia is a land of dreams. From the sacred legends of the aboriginal Dreamtime when the great spirits conjured the coral reefs, rainforests, and scorched, red deserts, to armchair travelers who describe Australia as their dream destination, the Land Down Under deserves all the hype. The world’s smallest continent and largest island, Australia is almost the same size as the United States, but with a population the size of New York State and some of the quirkiest wildlife on the planet. Australia is also a land of staggering contrast and spectacular beauty. Along the coast, visitors can explore vibrant multicultural cities, safari across vast sand islands, trek through ancient rainforests, and dive the Great Barrier Reef. In the Outback, rugged national parks and red-earthed deserts offer the ultimate in adventure travel. Top it all off with a laidback feel and friendly people and it’s no wonder Australia scores top billing on bucket lists around the world.

Conference Dates & Venue
May 14-16, 2018
Melbourne, Australia
